REL Anti-EMI Sticker is a ultra-thin sheet made by nano technology. With its unique Anti-Radiation Alloy Coating, this product can filter almost all mobile phone radiation. This product has already been officially recognized by Public Standard Bureau of Singapore (新加坡標準局) and Taiwan Industrial Technology Research Institute (台灣工業研究院). The Anti EMI Sticker is different from other mobile phone radiation-proof products because besides the electronic waves, it also protect mobile phone users from the harm of magnetic wave.

Instruction for using REL Anti-EMI Sticker :

- Attach it to the inner/outside wall of the phone,
- Or attach it to the battery surface,
- Or attach it to the inner wall of a phone shell,
- Or attach it to the inner surface of a phone bag.
